

## **ZTE Mifi Setup**

- 1. Insert a sim into the mifi and then connect via wifi or a USB cable if that is an option (USB option may need assistance from techsupport).
- If connecting via wifi: Open a web browser and try connecting to one of the below URL's http://192.168.0.1 or http://uf.ztedevice.com. You can add this link as a favorite/bookmark, then click the link when connecting to other ZTE mifi's moving forward.
- 3. If connecting via USB: You may be asked to install drivers (tech support may need to assist with this). If the drivers are installed you may get a network prompt to confirm, open a web browser and try connecting to one of the below URL's http://192.168.0.1 or <a href="http://uf.ztedevice.com">http://uf.ztedevice.com</a>. You may also have a new icon on your desktop, this can be clicked to access the dashboard (example below).

4. At the login screen type in the password below:

	PC   Mobile		
1			
	Password	Login	
	Display Password		

admin (All lowercase)

5. At the dashboard screen, click on 'Settings'

6. Click on the arrow to the right of 'APN'.

<b>(</b>	Connection Settings		200
			225
	Connection Mode	<b>&gt;</b>	
	Network Selection	<u>&gt;</u>	
	APN	<b>&gt;</b>	

7. To setup our APN click on 'Manual'

Mode	Auto     Manual
Profile	Orange - M6 mobile 🗸 🗸
РDР Туре	IPv4
Profile Name *	Orange - M6 mobile
APN *	orange-m6.je
Authentication	NONE
User Name	orange
Password	•••••
The setting can only be changed	when the modem is disconnected.

8. Then click on 'Add New'

Mode	○ Auto	Manual	
Profile	Default	$\mathbf{M}$	Add New
РDР Туре	IPv4		~

9. Type in the Profile Name and APN, then click on 'Apply' and then 'Set as default' after the page updates.

Current APN	orange m2m
Mode	Auto   Manual
Profile	Default Cancel
РDР Туре	IPv4 ~
Profile Name *	orangem2m
APN *	object-connected.fr
Authentication	NONE
User Name	
Password	
The setting can only be change	d when the modern is disconnected.

10. Make sure to click 'Set as default' after the page updates (Bottom Right Corner).

	Set as default	
The setting can only be changed when the modern is disconnected.		

11. Click on the ZTE logo in the top left to go back to the dashboard.

12. Click on Settings, then click the "Network Selection" arrow.

13. At the next screen, make sure Network Selection is set to "Automatic".

		1
Automatic	3G Only 🗸	
	Automatic	
O Manual	4G Only	
	3G Only	
	2G Only	
		Apply

14. Once done click the Apply button, then once again click the ZTE logo in the top left corner.

15. Click on Settings, then click the "Connection Mode" arrow.

16. At the next screen, tick the checkbox and ensure connection mode is "Automatic". Tick the checkbox to enable roaming.

Once done click the Apply button, then once again click the ZTE logo in the top left corner.

SID:ZTE_9C3940	LTE	EE	all			((î°°
SID:ZTE_9C3940		Shu	tdown	Modify	Login Password	Logou

17. At the dashboard, click the 'Off/On button' to activate data.

18. To test you can try load a webpage in another browser or another tab, you should see activity on the sim like shown below. Alternatively you can disable your wifi if you are unsure.

19. Lastly you can logout of the device using the logout option in the top right and disconnect the mifi device.
