

SOFTBANK APN PROFILE CONFIGURATION

iPhone

Before configuring the APN profile, connect iPhone to WiFi in device settings.

APN

To configure an iPhone to work with a Cellhire Japan SIM from SoftBank, follow the below instructions.

Important:

When finished with the Cellhire Japan SIM card, you must remove the configuration profile in order for data to work with your original SIM card/network provider.

Install Profile

1. Connect iPhone to WiFi.
2. Scan the QR below or follow the TinyURL link:
<https://tinyurl.com/ye237thd>

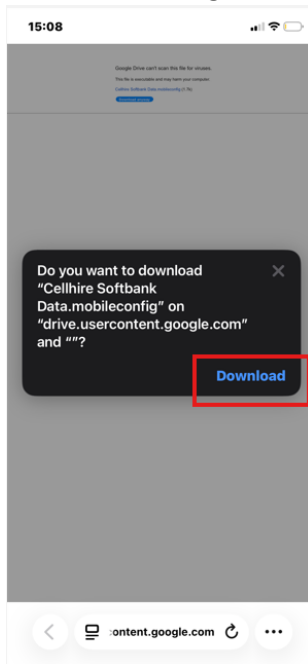

3. Follow the below download process instructions

Instructions:

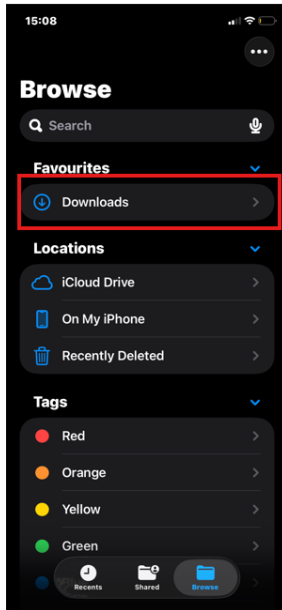

1. After following the link, you will arrive at the download page. Click download.

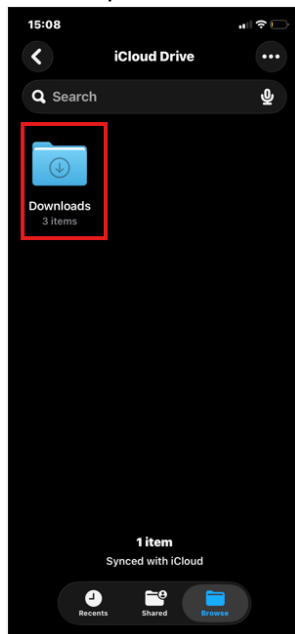

2. Click download again

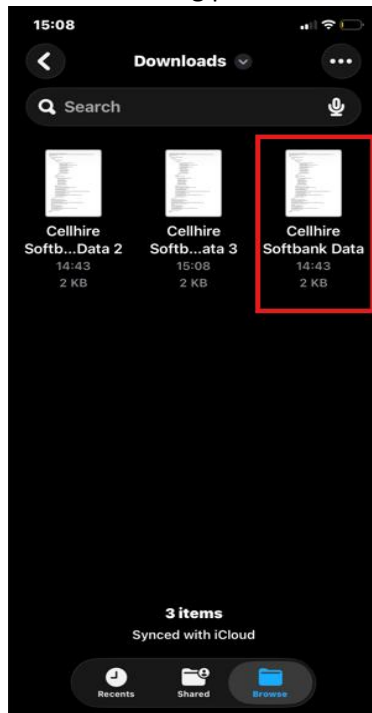

3. Go to your 'Files' app and click on downloads

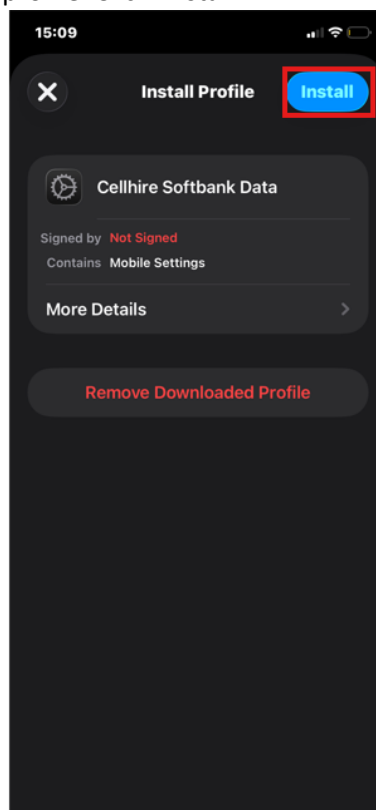

4. Click on your downloads folder:

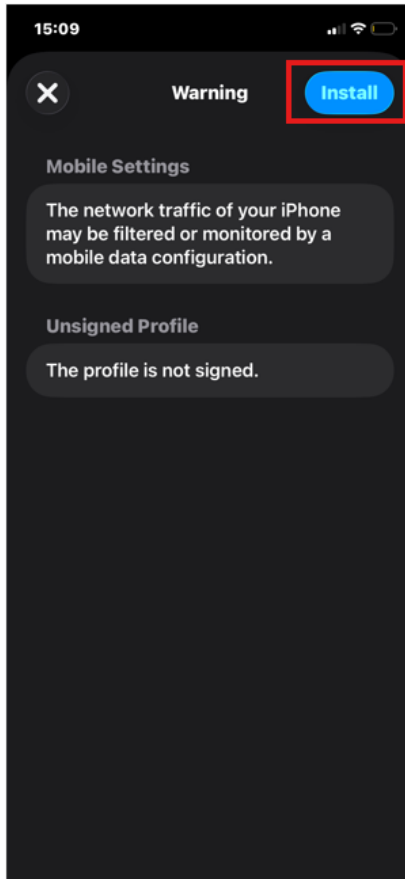

5. Select the config profile download:

6. The profile will then be downloaded into your settings page. From the main menu in 'Settings' app, select 'Profile Downloaded'. From there, you will be prompted to install the profile. Click 'install'

7. You will be prompted to input your passcode and then click install again.

Remove Profile

1. Open iPhone Settings menu and go to General.
2. Scroll down to Profile and click on Cellhire SoftBank Data.
3. Tap Remove Profile and follow the on-screen instructions (note – you may need to enter iPhone pin code to proceed).
